

Management Information

Reports

A number of pre-formatted reports are available online including CO2 Reporting, Expenditure by Organisation, Travel Profile Exceptions, Class of Travel and City Flow.

The richest in data of all of the reports is Ticket Export report.

Presenting information, in this level of detail, in a format that can be easily edited using Microsoft Excel, means that your organisation can analyse every aspect of their rail spend and easily create their own reports, graphs and charts or upload it into another database or system from the end.

As well as every variable associated with a transaction being captured at the time of booking, full CO2 emissions for the rail journey booked are also captured.

In addition our MI also includes a multi-modal comparison of CO2 emissions on other methods of transport for the same journey.

Passenger	From	To	Distance (miles)	Rail CO2 (kg)	Aeroplane CO2 (kg)	Car - Petrol CO2 (kg)	Car - Diesel CO2 (kg)	Bus / Coach CO2 (kg)	Motorcycle CO2 (kg)
MR J HODGES	SURBITON	WOKING STATION	24.62	2.39	6.82	8.3	7.87	3.53	4.23
MR R BROWN	LONDON TERMINALS	LEEDS	371.76	36.02	103.03	125.34	118.88	53.31	63.84
